01 / COMPANY OVERVIEW

We handle your project.

Maraimeeth is an Abu Dhabi general contracting and construction company, building residential villas, residential buildings and commercial projects since 2005.

We work with you and your consultants to align your property, budget and ambitions. Practical advice, personal attention and careful workmanship guide our approach.

Industrial investors

A considered approach

Recommendations shaped around what is best for you — and what fits your goals, your property and your investment.

02 / OUR EXPERTISE

Construction. Care. Continuity.

01 General Construction

Residential villas · Residential buildings · Commercial buildings · Compounds · Warehouses · Industrial projects

A practical approach to new construction, shaped around your goals and delivered with attention to quality, function and value.

02 Metallic Installation

Structural steel · Railings & façades

Precision-crafted metalwork that brings together function, workmanship and the architectural character of a space.

03 Maintenance & Renovation

Year-round maintenance · Modern upgrades

Caring for existing properties and shaping thoughtful upgrades for the way you live and work.

03 / WORKING TOGETHER

From your goals to handover.

01 Consult

We listen to your goals, visit the site and advise on what works best for you.

02 Plan

Agree an approach, quote, timeline and method around your project priorities.

03 Build

Our skilled teams execute with attention to quality, workmanship and clear communication.

04 Maintain

Support the property after handover through maintenance and thoughtful upgrades.

04 / QUALITY & ASSURANCE

Certified & licensed.

06 / PROJECT ADVICE

The right approach for you.

Before construction begins, the most useful conversation is about your goals. We help you consider the property, your priorities and the long-term value you want to create.

Your objectives

A home for your own use, a rental investment or a resale development each calls for a different balance of decisions.

Your site

Plot location, access, surroundings and planning considerations shape the practical approach to your project.

Your priorities

Discuss quality expectations, functionality, finishes and the features that matter most to you.

Your budget

Consider the project as a whole, including construction, finishes and external works. Advice should reflect your individual scope.

Your next step

Share your project goals, site location and needs. We can discuss relevant services and prepare a tailored inquiry.
